SUMMARY

I am a recent Computer Science graduate with a keen interest in software and web development. Currently, I am exploring frontend technologies like React to enhance my skills. I am eager to learn and grow while contributing to real-world projects in a collaborative environment. I seek opportunities to apply my foundational knowledge and improve through practical development work.

EDUCATION

Bachelor of Technology in Computer Science Engineering, College of Engineering, Thalassery CGPA: 8.2	2021 – 2025
Higher Secondary Education, GVHSS Chirakkara CGPA: 9.5	2019 – 2021
Secondary School Education, MES Bava Secondary School CGPA: 8.8	2018 – 2019

SKILLS

– HTML | CSS | JavaScript | GitHub | Data Structures | Iot | Python | React | SQL | Java |
GPS

LANGUAGES

English | Malayalam | Hindi | Arabic

INTERESTS

Web Technologies

Exploring new web technologies and frameworks.

UI/UX design

UI/UX design and frontend development

Technical Research

Technical research and innovation in smart systems

Creative Expression

Creative expression through painting and sketching

Continuous Learning

Continuous learning through tech blogs, tutorials, and hands-on projects

CERTIFICATIONS & WORKSHOPS

Python Programming Basics

- Control structures, syntax, logic building

Introduction to IoT

- Architecture, protocols, real-world IoT systems

Intelligent Systems Workshop, IIT Palakkad

- Hands-on AI with Jetson Nano

Design Marathon

- Prototyping and innovative solution development

Metallography Basics

- Microstructure analysis and mechanical behavior

PROJECTS

Smart Helmet System

- Real-time accident detection using ESP32, MPU6050, GPS, GSM
- GPS tracking and SMS alerts to emergency contacts
- Web dashboard for monitoring alerts

Crisis Compass

- Disaster management platform with MySQL backend
- Real-time monitoring and relief coordination support

Student Management System

- Admin portal for managing student and teacher records
- Login, dashboard, and secure data access using MySQL
